TESTING LAB

We are geared up with a huge infrastructural set-up in order to meet the growing demand of our clients. We are equipped with latest machinery and are able to call on technology and experienced personnel covering a wide range of skills related to plastic pipes and their applications.

■ HDPE PIPES ■

Solanki Pipes manufactures a wide range of HDPE pipes conforming to various standards of national and international repute. Manufactured with state-of-the-art technology, these pipes are lightweight, strong, long-lasting, maintenance free, and flexible due to inherent elasticity. These pipes are tough due to their high flexural and impact strength. They are capable of withstanding high internal and external exertions by balancing internal as well as external soil pressure. In addition to it, they are resistant to chemicals and hostile corrosive soil, strongly resistant to acids, as well as alkalis, and can be laid in marshy and corrosive soils without any coating or cathode-based protection.

IS CODE	:	IS:4984: 2016, IS:14333: 2022
SIZE	:	25mm To 1000mm
GRADE	:	PE-63, PE-80, PE-100
PRESSURE	:	PN 2 To PN 16

■ MDPE GAS PIPES ■

MDPE Pipes have Inherent characteristics such as Corrosion & crack resistance, toughness, and flexibility making the polyethylene piping system the most preferred means for the transportation and distribution of water, petrol, and natural gases worldwide. The raw material used is Medium Density Polyethylene (MDPE). Solanki Pipes manufactures MDPE Pipes in grades PE-63, PE-80 & PE-100 for water & gas applications in sizes 16 mm to 500 mm (Outer Diameter) in PN 16. Traditionally these Pipes are identified by their colour for different uses like blue for water, orange for petrol, and yellow for gas pipelines.

IS CODE	:	IS:14885: 2022
SIZE	:	16mm To 500mm
GRADE	:	PE-63, PE-80, PE-100
PRESSURE	:	PN 16

■ PVC PIPES ■

Be it a transfer of potable water from a water source to homes or for industrial use, it is necessary that the piping system is strong enough to bear any external force, sustain under any environmental conditions. Solanki Pipes is one of the best PVC pipe manufacturers in India with a well-diversified portfolio that is ideal for industrial, household, infrastructure and agricultural needs. Our range of piping system includes. Our Pressure Plus PVC Pipes are manufactured using world-class uPVC material to get more strength and stiffness. These PVC pipes are resistant to UV radiation and corrosion, making them ideal for agricultural purposes.

IS CODE	:	IS:4985: 2000
SIZE	:	63mm To 315mm
GRADE	:	CLASS-1, CLASS-2, CLASS-3 CLASS-4 & CLASS-5

■ SPRINKLER PIPES ■

Solanki Pipes offers HDPE-coupled pipes, fittings, and accessories, for sprinkler irrigation system. This is used for spraying water through nozzles of the drip irrigation pipe to get maximum efficiency. This system consists of irrigation pipes and fittings along with different accessories which are designed and developed by experts in the field to provide the best quality. Solanki Sprinkler Irrigation System can be used even in undulating fields with excellent results and is useful for all most all types of soils and crops. The sprinkler irrigation pipes, while helping in reducing the requirement of water for irrigation, effectively prevents soil erosion.

IS CODE	:	IS:15105: 2021
SIZE	:	63mm To 250mm
GRADE	:	PE-63, PE-80, PE-100
